

## be.tex® Whiteback Zebra FR

Art.No. 4280-XXXX-2665-WB

### Description

Like the stripes of a zebra, so too does the textile: white/black/white. The front and back of the fabric are white and enclose a black barrier layer. And with its stretch factor, it is particularly suitable for Display Frame Systems. This allows you to showcase projects up to 5 metres in size. In our accessories you will find the right profile. Important: Run a print test! Many factors influence the textile during printing and application. All technical data were determined according to the current state of measurement technology and reflect the values of the measurement sample. Despite the highest quality standards, there may be production deviations – all information are legally non-binding and without guarantee.

### Main Application

Blackout

### Applications

Display Frame System  
Light Box Rear Cover  
Stand Construction

### Features

Blackout  
No fraying  
White back
